SKILLS

- Languages** JavaScript, TypeScript, Python, Node.js, React, Vue, Angular, Next.js, PHP, Ruby on Rails, Laravel, GraphQL, MySQL, MongoDB, PostgreSQL
- Infrastructure** Docker, Kubernetes, AWS, Azure, Supabase, Render, Vercel, Stripe, New Relic, Cypress, Kafka, RabbitMQ, Git
- AI in workflow** Claude and ChatGPT used daily for design exploration, code review, and debugging

EMPLOYMENT

Trader Interactive — Software Engineer

July 2023 – Feb 2026

- ▶ Owned frontend delivery across 8+ commercial marketplace sites serving 100K+ monthly visitors, working in Vue, TypeScript, PHP, and Laravel inside Docker
- ▶ Designed and built a library of 30+ reusable Vue components, cutting duplication across product teams and reducing new-feature build time by 15%
- ▶ Implemented retry, timeout, and fallback logic on the Vue client for a redesigned RESTful API contract, reducing user-facing failures and cutting integration time by 25%
- ▶ Diagnosed production issues using New Relic across 8+ marketplace sites, tracing errors back to root cause and shipping fixes that improved frontend stability

SharpNotions — Software Engineer

Dec 2021 – June 2023

- ▶ Scoped and drove the Vue 2 to Vue 3 migration across 50+ components, ordering work by component usage and risk so the most-used components migrated first under heaviest test coverage
- ▶ Built backend components in Python supporting client projects, working across the stack alongside the Vue, React, and Rails frontends
- ▶ Built and maintained a Cypress test suite of 100+ end-to-end tests covering critical user flows, cutting manual QA time by 40%

Xerox — Software Engineer

Feb 2020 – Dec 2021

- ▶ Shipped customer-facing features in C#/.NET, Angular, and React on AWS, working across a team of 30+ engineers
- ▶ Built and integrated an Amazon Lex chatbot for customer FAQ handling, using S3 for chat hosting, a RAG pipeline for grounded responses, and audio logs for transcription and review

PROJECTS

PropScore — Full Stack Engineer

Feb 2026 – Present

Real estate platform for property investors and managers, built with a small team of part-time collaborators. Stack: React on Vercel, Node API on Render, Supabase for Postgres and auth, Stripe for billing, with an Expo mobile client for iOS and Android in development.

- ▶ Debugged a Stripe price-ID resolution bug misclassifying subscriber plan tiers in production, shipped a `planFromSubscription` fallback, and added regression coverage
- ▶ Drive technical direction on a small team, running design discussions with a senior engineer and owning the resolution on architectural decisions
- ▶ Mentor a junior engineer through environment setup, codebase walkthroughs, and scoped work designed to build understanding of the system and stack

Salon Reed — Web Developer

Feb 2026 – Present

Chair-rental hair salon on Park Ave in Rochester, NY, with stylists booking their own clients.

- ▶ Built and maintain the salon's site on GitHub Pages, with Acuity Scheduling for booking and a content structure the chair renters update themselves to change their profiles, photos, and booking links

EDUCATION

Rochester Institute of Technology — BS, Game Design and Development

Rochester, NY
